Take command of your home or office by consolidating all your electronics and controlling them with one simple, universal remote. When you're shopping for universal remotes, keep your devices firmly in mind. If you want to control smart home functions, you need a remote that's capable of handling all of your tech accessories. If you only need a simple remote to replace one you've lost, stick with budget-friendly options. Whatever your needs may be, there's an option out there that's right for you. We've rounded up 10 contenders for your consideration. MORE FROM CONSUMERSEARCH.COM Setting up a universal remote control is a great way to reduce clutter in your home. These handy accessories are easy to set up and are compatible with a wide range of devices. What Is a Universal Remote? A universal remote can control a variety of different electronic devices, including TV sets, DVD players, Blu-ray players, DVRs and stereos. Therefore, you just need one remote instead of several, and switching on your entertainment system is much quicker and easier. There are several different brands available; RCA and GE are two popular brands in the US. How Do You Program a Universal Remote? Programming a universal remote is usually quick and easy. It usually just involves punching a combination of buttons to pair it with your devices. However, the exact combination of buttons varies between brands and models. Your best bet is to find the manual that came with your remote and look up the remote control setup codes. You can also usually find these online on the manufacturer's website. Programming an RCA Remote Most RCA remotes have the same setup process. Just turn on the device you want to pair with the remote and press the button on the remote for that device. For example, if you want to pair it with a TV, press "TV." Wait for the "On/Off" button to light up and then press and hold that button and the button for the device at the same time. When the "On/Off" button lights up again, let go of the buttons. Press the "Play" button and wait for your device to turn off. If nothing happens, wait a few seconds and then press "Play" again. Once it turns off, press "Reverse." If the device switches back on, you have successfully programmed your remote. Press "Stop" to save the changes. Programming a GE Remote GE remotes use remote setup codes. These are available online or in your remote control's documentation. To use the codes, turn on the device you want to pair, press "Setup" and wait for the light on the remote to turn red. Press the appropriate device button, enter the code and wait for the light to turn off. Press the power button on the remote to see if the code worked. Troubleshooting a Remote That Doesn't Work If the programming purpose didn't work, try the process again. If your remote uses codes, you may want to try a different code. If your device still doesn't respond, go to the manufacturer's remote control support page. From there, you can access a new remote control code list, find troubleshooting instructions or contact customer support. MORE FROM QUESTIONSANSWERED.NET Enter one of the programming code from the list 0498 0497 0506 0535 0512 0466 for your CISCO Cable device. How To Pair TWC Digital Adapter Remote With TV ... the One for All Smart Zapper. This great gadget uses Bluetooth to ensure you can control your TV, set-top box and even DVD player and audio system from your smartphone or tablet.
